

THE SMARTER WAY TO FIGHT SCAMS

SPARKLEBOT[★]

WHY IT MATTERS

1 THE SCAM PROBLEM

Scams remain a serious threat in Singapore.

37,308
SCAM CASES
IN 2025

Reported in Singapore
(a 27.6% drop from 2024)

\$S\$913.1
MILLION LOST

Total losses in 2025

36.1%
OF VICTIMS ARE
ADULTS (30-49)

Largest share of
scam victims

81.8%
SELF-EFFECTED
TRANSFERS

Victims manipulated into
sending money themselves
via social engineering

2 WHY TRADITIONAL METHODS FAIL

**BLACKLIST FILTERING
ONLY DETECTS
KNOWN SCAMS**

Cannot catch new numbers,
links or websites used
by scammers.

**RULFI-BASED
DETECTION CAN BE
EASILY BYPASSED**

Scammers change wording
and tactics to escape
keyword rules.

**MANUAL VERIFICATION
IS SLOW & REACTIVE**

Users must actively search
for help—often too late
to prevent losses.

**NO REAL-TIME
EXPLANATION OF
SCAM RED FLAGS**

Traditional systems can't
educate or explain warning
signs in real time.

3 WHY SPARKLEBOT IS DIFFERENT

**AI-POWERED
360° SCAM
DETECTION**

Analyses messages, URLs
and screenshots to detect
sophisticated scams
in real time.

**MULTI-MODAL
ANALYSIS**

Understands text,
links and images—
including hidden text
in screenshots.

**CONTEXTUAL
UNDERSTANDING**

Uses semantic AI to
understand intent and
meaning, not just
keywords.

**RAG KNOWLEDGE
SEARCH**

Retrieves trusted,
up-to-date information
from verified sources
for accurate guidance.

EXPLAINABLE AI

Clearly explains why
content is risky with
visible red flags and
recommended actions.

**REAL-TIME
RISK SCORING**

Instant risk level,
scam type and
personalised actions.

**SCAM
REPORTING**

Easy reporting to help
protect the community
and others.

**SCAM TRENDS
DASHBOARD**

Live insights and
analytics to track
scam patterns
in Singapore.

**PERSONALISED
AI GUIDANCE**

Get follow-up help,
prevention tips and
learning tailored
to you.

**LEARN. PRACTISE.
STAY SAFE.**

AI Simulations, quizzes
and personalised
learning build long-term
scam resilience.
